UHT Full Cream Milk

New package 200cc Factory

Skimmed Milk Powder, Full Cream Milk Powder, Instant Full Cream Milk Powder

Spray dried, instantly lecithinated Milk Powder. Mixture is based on skimmed milk and edible vegetable oil.

Description: The powder is obtained through the spray dried and instant lecithinated process. This process is applied to a mixture based on skimmed milk powder and edible vegetable oil approved for human consumption.

Suggested applications: this milk can partially or totally replace whole milk powder in food applications such as yogurt, cheese, ice cream and bakery. It helps increase the functional and organoleptic properties in the finished products while significantly reducing cost. This ingredient can be used in its powder or reconstituted form .
(reconstitution: 0.9 liter of water for 130g)
